

Launch of GPS Navigator-Tanluzhe303N

Following the successful launch of Tanluzhe303 GPS Safe Driving Voice Notifier in July 2006, MTY has launched a new product – Tanluzhe303N GPS Navigator into the market on 18 June 2007.

Tanluzhe303N GPS Navigator possesses the following features:

- Newest intelligent-navigation-digital map covers 31 provinces, municipalities and autonomous regions, including 566 cities and 2,862 counties, including more than 6.8 million POI (point of interests) and information of numerous travel scenic spots that people expect to find.
- High-precision GPS broadcast chips with the 3rd generation SIRFStar-20 channel and inbuilt antenna can search rapidly, position accurately and has strong anti-shelter ability, which is suitable for building-intensive cities.
- High speed CPU with Samsung S3C 2440(400MHz) and WinCE 5.0 embedded core enable the system run smoothly. Different functions like navigation, movie/music player, games and entertainment can be switched between each other freely. 2000 MAH original lithium battery is safe, high efficient and has long lasting navigation ability.
- High definition Samsung 4.3 inches (16:9) TFT intelligent touch LCD screen is of high quality images and 65,000 colours. It is user-friendly with high identification ability for handwriting input.
- Large capacity - 2G SD memory card.
- Stream-lined design fits in with human body engineering and environmental protection. Universal cupule cradle can be easily installed and dismantled, freely adjusted, safe and reliable.

- Support the technology of automatic follow-up of light energy of the environment to adjust the background light of screen.
- Humanized-intelligent voice navigation provides various navigation approaches, route plan, automatic search, voice notifier, overspeed alarm on the road and simple operation to assure the driving safety. When there is deviation between the actual driving route and the preset navigation route, automatic-deviation-adjustment system can promptly indicate a new route for the driver to reach the destination, by which the driver will not worry about going the wrong way.
- Multi-media and video-entertainment system contains various entertainment functions such as MP3 music player, movie player, games entertainment, digital photo album, electronic clock, notebook and memorandum can bring rich and colourful entertainment life for the drivers at any time and in any places.
